

HTML – Final Project

Hello guys!

This is Final Project for the HTML Module.

Give it your best. Once you have completed it, you can add the project to the GitHub repository.

You need to create a new GitHub repository and push the local project files to this repository.

You can find a PDF file in the resources section that will help you push your local code to the GitHub repository.

I can't wait to see what all you guys design!

All the Best!
